

# HELPING YOUR AGENCIES GET THE RUGGED DEVICES THEY NEED

The Lifecycle Financing Program

## LIFECYCLE FINANCING PROGRAM

Many public safety and government agencies would like to purchase and deploy rugged Getac laptops and tablets, but are unable to do so because of a lack of funding.

The Strategic Sourcing (SSI) Lifecycle Financing Program can help. Agencies can now lease these rugged devices and pay for it over 3 to 5 years on a monthly or annual basis. By using this program many customers have found that they actually pay less than if they bought the equipment outright.

The Benefits of this program are as follows:

- Customers would always have a fixed and predictable amount of money they would spend per month or year on this equipment.
- Customers can either buy out the equipment at the end of the lease or return and refresh it.
- Customer's laptops would always be current and never go out of warranty, therefore any needed repairs would always be free.
- Customers would have a deferred payment option which would allow them to start paying on the lease months after the equipment arrives.
